

## PRONTO FLEET MANAGE

A comprehensive web based Fleet Management

Companies that manage large fleets face challenges in terms of improving vehicle and employee productivity, reducing cost and improving customer satisfaction. These challenges are compounded by lack of information which when not addressed prove costly.

Pronto Fleet Manage is a web based application that assists Fleet Management companies to manage all these challenges comprehensively. With **Pronto Fleet Manage companies can address issues concerning Fleet, Customers, Contracts, Services, and Employees.** The application allows for integration with a GPS device to track the assets real time, allows for automating invoicing process, track account receivables and even analyse customer activity.

Pronto Fleet Manage offers the following key features -

### VEHICLE MAINTENANCE

Track vehicle maintenance records and other information like insurance/permits etc. also track tyre change/usage records.

### VEHICLE TELEMATICS

The tool allows for easy integration with GPS devices for real time tracking of vehicles hence allows for planning of routes and tracking of shipments.

### DRIVER MANAGEMENT

Track Drivers' safety record, configure driver to vehicle type eligibility, understand drivers' profile and their accident records.

### FUEL MANAGEMENT

Track Fuel usage and analyse the fuel consumption of a vehicle to compare it with other vehicles of same type.

### VEHICLE FINANCING

Track loan/EMI related information, also determine ROI at any given time.

### CUSTOMER MANAGEMENT

Allows for grouping of customers based on the usage levels/ profitability/contribution to the revenue (top line), track accounts receivable and automatic invoice generation for recurring services.

The application is developed on Microsoft ASP .Net platform with Sql Server as the database. It is web enabled to allow access from anywhere and has an UI which is easy to navigate. The tool allows for additional HR and Finance modules and allows for reports that can be easily customizable.

## KEY BENEFITS -

1. Greater overall operational efficiency
2. Improved vehicle safety
3. Run-time metrics for best practices
4. Identify fleet inefficiencies & underused vehicles
5. Reduced fuel costs
6. Increased productivity
7. Better Customer Management
