

## SMART SAFES AND INTELLIGENT CASH MANAGEMENT

Pronto Software Solutions has built expertise in Smart Safes and Intelligent Cash Management systems.

For over a decade now, we have been working with some of the world's leading companies in this vertical and have been involved in developing software to manage end-to-end processes from manufacturing, sales, service and 3rd party integrations with cash handling companies.

### SMART SAFE MANUFACTURING SUPPORT SYSTEM

We have experience building specific applications for inventory management, be it to manage raw materials or finished product, Lock shipping label printer application and lock combination generator application to generate master and user lock codes for number pad key

### SMART SAFE SOFTWARE DEVELOPMENT AND TESTING

We have partnered with leading cash management companies, developed and tested software to operate Safes through micro-processors, embedded OS, client-server web application and even through a Mobile app interface.

### SMART SAFE SALES AND SERVICE MANAGEMENT

We have built an exclusive CRM system for the Safe industry which takes into consideration some of their minutest processes, we have experience creating - Retail Sales, Installation, Returns, Services, Customers, Vendors and Reports modules.

### LOCKSMITH MANAGEMENT SYSTEM

Locksmiths form an important component of the Safe industry, to streamline their operations, we have created a system to manage, Work Order Assignment, Work Status Tracker, Inventory Management, Invoice Management and Customer Feedback Management.

### INTELLIGENT CASH MANAGEMENT SYSTEM

Having worked with some of the top cash handling companies in USA, we have a good understanding of the workflow and can assist in software customization and 3rd party integration with their service ticketing systems either through, Email, JSON, XML, flat file. We have expertise in developing Smart Safe Integration with POS machines and check scanners.

While working together Pronto helped to first create and then mature the software QA processes at ... Because of this work ...was able to improve the quality of software deliverables, drive down defect rates, and ultimately deliver better quality software on shorter more accurate timelines to customers.
